Subject: Paden City

Mike,

Since WVDEP has contacted EPA last year around 8/30/17 the situation at Paden City has deteriorated somewhat. EPA asked for WVDEP's permission to do a RSE, but I believe it was never done because data at that time did not support the action. However, since then there has been data that indicates levels of PCE in the finished water at Paden City's public water supply have exceeded MCLs and are trending higher. Bill Huggins, WVDEP Project Manager, has been in contact with the Public Works Director, Josh Billiter, who has informed Bill that they have tried a variety of fixes, within their means, to remedy the exceedances. They have been unsuccessful. A violation may occur if another quarterly sample comes in above MCLs. If this happens a public notice would be issued. WVDEP would like to request a RSE to assess the situation and possibly perform an interim or TCRA to identify and/or mitigate possible sources.

Thank you for your consideration on this matter.
